MICROSOFT 365 & IDENTITY

File Server to SharePoint Online Migration
Xcoal · SharePoint Online, OneDrive

Moved 15 years of files off an unmanaged file server. Met with every department, named an owner in each, trained champions and got proof-of-concept sign-off. Closed a gap where **privileged information was visible company-wide**.

Lab Document Automation
Xcoal · Power Automate, SharePoint

23-action flow that reads lab emails, identifies the vessel or rail car, and tags and files each coal-analysis document into SharePoint, with a weekly sweep that flags anything unmatched.

Account Lifecycle Automation
PHOENIX · PowerShell, Entra ID, Office 365

Scripts that create **up to ~100 users per run**, assign licenses by office and add self-service password reset, plus security and distribution groups for each of ~50 new clinics.

Dynamic Groups for SharePoint Access
PHOENIX · Entra ID

Membership rules that placed staff in the groups granting the SharePoint permissions their role needed.

Intune & Autopilot Onboarding
PHOENIX · Intune, Autopilot

Laptops shipped straight to staff, who signed in and let the device configure itself.

Office 365 Licensing Cleanup
PHOENIX · Office 365

Found unneeded licensing and cut over **$10,000 a year** in operating spend.

SECURITY

MFA, SSO & Password Manager
Xcoal · Duo, Bitwarden

Rolled out Duo MFA with SSO across ~4 business apps, moved password storage to Bitwarden, and set up the company's first ticketing system.

Lateral Movement Detection
Xcoal · OpenCanary, Ubuntu Linux

Decoy server (for example, a fake password database) that alerts IT and the help desk when anyone touches it.

Penetration Testing & Threat Reviews
Xcoal · Pentera, external NOC/SOC

Coordinated automated penetration tests and drove the fixes (SMB signing, LLMNR and NetBIOS disabled, LAPS); reviewed threats with the NOC, SOC and leadership every quarter.

Phishing Simulation
PHOENIX

Spear-phishing campaign found a **30% failure rate**; followed up with remedial training.

Secure Support VM
VPO · Azure, ARM template, Tailscale

Rebuilt the support team's VM, which had a shared login over internet-exposed RDP, with per-user accounts reached only through Tailscale.

INFRASTRUCTURE & NETWORK

Network Buildout
Xcoal · FortiGate

FortiGate firewalls and switches, cabling, patch panels and network documentation across 2 primary locations.

Servers, Identity & Backup
Xcoal · Windows Server, AD/Entra ID, VMware, Nutanix, Veeam

Ran hybrid Active Directory and Entra ID on Windows Server 2016, VMware and Nutanix, with Veeam and Nutanix Xi Leap backup, 24/7/365 for ~100 users on three continents.

Acquisition IT Deployments
PHOENIX

Coordinated equipment, vendors and staff for acquisitions of **up to 10 practices at a time**; wrote specs and Statements of Work for 20+ new locations.

OPERATIONS & SUPPORT

IT Documentation Program
Xcoal

Network maps, hardware and software inventories and project documents, reviewed quarterly with the CIO.

Live Event Support & Log Scripts
Ascend FS · PowerShell, Jira

On-site support for pro sports league clients in North America and Europe; PowerShell log-gathering scripts for Jira escalations.
