Joshua Henderson

SYSTEM ADMINISTRATION | MICROSOFT 365, ENTRA ID, ACTIVE DIRECTORY

(724) 708-9551 | Joshua.Henderson@hotmail.com | linkedin.com/in/joshua-s-henderson | Johnstown, PA

PROFESSIONAL SUMMARY

System Administrator and Microsoft Cloud Engineer with 13 years in tech. Sole IT Administrator for ~100 users across North America, Europe and Asia with 24/7/365 continuity expectations, administering hybrid Azure AD (Entra ID) and on-premises Active Directory on Windows Server, with PowerShell account lifecycle automation and Intune and Autopilot onboarding. Most recently administered SharePoint webhooks across 30+ distinct tenants through a single pane of glass built on Azure.

CORE COMPETENCIES

Microsoft 365 | Active Directory & Entra ID | Windows Server | Identity Lifecycle Automation (PowerShell) | Intune & Autopilot | Systems Administration | Azure & Log Analytics | Documentation & Ticketing

WORK EXPERIENCE

VPO Construction Management Software & Services

01/2023 - 09/2026

Application Developer

Pittsburgh, PA

- Designed and built the interface for an internal administration application (React 19, TypeScript, Vite, Azure Static Web Apps), which provides a single pane of glass to administer SharePoint webhooks across 30+ distinct tenants.
- Authored a PowerShell SharePoint framework to provision new tenants, site collections and subsites, with an auditor that validates each build against the gold-standard template and emits an HTML compliance report.
- Architected a high-volume construction drawing issuance system for the platform's largest client on Azure Durable Functions with filtered telemetry in Log Analytics.
- Built Azure Pipelines with rollback for SPFx and .NET deployments; ran an AI-driven QA pass of browser-automated cases that caught a systemic high-severity defect manual testing had missed.
- Using Azure Durable Functions, SPFx and SendGrid, built an email digest system with an end-user-facing configuration interface that iterated over SharePoint tenants and lists to surface coming-due actionable tasks.
- Drove AI adoption across a five-developer team with Claude, ChatGPT and Cursor, leading to improved QA, detailed documentation and consistent code across projects.

Xcoal Energy & Resources

03/2020 - 01/2023

System Administrator

Latrobe, PA

- Sole IT Administrator for ~100 users across North America, Europe and Asia with 24/7/365 continuity expectations.
- Administered hybrid Azure AD (now Entra ID) and on-premises Active Directory with Windows Server 2016.
- Led the company's migration from a 15-year-old unmanaged file server to SharePoint Online and OneDrive. Completed department-head discovery, trained champions, and closed a gap where privileged information was visible company-wide.
- Drove the company's first IT documentation program with quarterly reviews, keeping documentation current and exposing issues before they became problems.
- Implemented, configured and drove adoption for multi-factor authentication with Duo, an SSO-secured password manager with Bitwarden, and the company's first ticketing system.
- Managed a VMware and Nutanix environment including on- and off-premises backup with Veeam and Nutanix Xi Leap.

- Designed and built a Power Automate system that files incoming coal-analysis documents automatically, parsing lab emails to identify the vessel or rail car, tagging and filing them into SharePoint, with a weekly sweep that flags anything unmatched for review.
- Tracked and responded to incoming threats by working closely with the external NOC and SOC, reviewing results quarterly.
- Configured and implemented FortiGate firewalls across multiple locations and addressed network issues as needed.
- Used OpenCanary on Ubuntu Linux Server to implement an on-premises canary that proactively detects lateral movement.

PHOENIX Rehabilitation and Health Services

02/2019 - 03/2020

Cloud/Network Administrator

Blairsville, PA

- Administered the hybrid Azure Active Directory (Entra ID) and Office 365 environment, including PowerShell scripts that automate the Active Directory/Entra ID account lifecycle.
- Set up Microsoft Intune and Autopilot to automate onboarding of users and computers, vastly decreasing onboarding time in a growth-focused corporate environment.
- Single point of contact for all network and telephony issues across 100+ clinics and 400+ end users.
- Identified unnecessary Office 365 licensing spend, saving over $10,000 in operating expenditure per year.
- Coordinated equipment, vendors and staff for IT deployments during acquisitions of up to ten practices at a time; wrote infrastructure specifications and Statements of Work for 20+ new locations.
- Spearheaded a phishing simulation program identifying a 30% failure rate, then delivered remedial training.
- Leveraged the Office 365 suite to enable cohesive file sharing between users at clinics.

Ascend FS (formerly Gaming Nation Inc.)

06/2016 - 02/2019

Tier 2 Support Specialist / Installation

Remote

- Provided on-site technical support for high-profile clients associated with professional sports leagues across North America and Europe.
- Developed PowerShell scripts to speed up troubleshooting and log gathering before escalating a JIRA ticket, giving developers the tools to quickly identify issues in the software.
- Used technical knowledge in high-stress, time-sensitive situations to resolve client issues, minimizing interruptions.
- Created detailed guides for future trainees and customer-facing training manuals.
- Engaged with customers and maintained positive business relationships through Salesforce CRM.

EDUCATION

Associate Degree, Information Technology / Computer Network Systems ITT Technical Institute 2014-2016

Tarentum, PA

4.0 GPA, highest honors, National Technical Honor Society. Worked full time in IT throughout.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) Microsoft 2026
